# WORLD CLASS CANDIDATES

Simon Business School | Career Management Center

## Program Overview

Business moves fast, and the right direction isn't always so clear. At Simon, we tackle this problem head on. Our strengths in quantitative work are legendary, giving our students a solid understanding of economics and analytical thinking. **Simon graduates know the role of data and how to use it to make a difference. They ask the right questions to cut through the ambiguity of today's business problems.**

And they are naturals at solving problems independently or as a team. Our programs emphasize leadership through collaboration. Simon students embrace teamwork in a program that consistently ranks among the most diverse in the world.

## The Simon MBA

Some of the brightest minds in business today are graduates of Simon's selective MBA program. Smaller classes—and access to the renowned scholars who teach them—ensure our students become critical thinkers and collaborators. Recruiters agree: More than 94 percent of graduates have jobs three months after graduation. With a grounding in Simon's legendary strengths in economics and analytics, they bring clarity to the challenges of business.

Our MBA students discover business opportunities through career treks and internships with companies all over the world. And they are in demand with local venture capitalists and startups, often initiating projects themselves.

**We look forward to connecting you with MBA talent.**

# MSF

## MS in Finance

The global finance field is challenging, competitive, and always changing. Simon’s distinct approach to finance—highly quantitative and economics based makes it our most sought-after MS program. Our expert faculty trains our graduates to frame financial market challenges, apply big-data insights, and build meaningful solutions.

# MSA

## MS in Accountancy

To prepare for a career in corporate accounting, internal audit, or as a licensed public accountant, our students master a wide range of competencies, including financial reporting, treasury, auditing, research, and analysis. The Simon Accountancy program emphasizes the dual roles of finance and economics to address the needs of the industry. The 150-credit-hour compliant program also qualifies our graduates to sit for the NY State CPA examination.

### STEM ready.

Science, Technology, Engineering and Mathematics (STEM) fields are essential to US economic competitiveness and growth. Under STEM classification, our international graduates can qualify for a 24 month extension to their OPT (Optional Practical Training), giving them the option to work in the US for up to 3 years before H1B sponsorship would be required. We look forward to connecting you with top MS talent.

# MSMA

## MS in Marketing Analytics

With companies relying more on large amounts of information to drive their decisions, successful marketing practitioners must be able to understand, analyze, and strategize in a big-data world. Simon’s one-year Marketing Analytics provides our students the skills for developing innovative marketing solutions while integrating learnings from our distinctive pricing coursework. Workshops, group projects, and in-class instruction are all integrated into the academic experience.

# MSBA

## MS in Business Analytics

The latest in machine learning, data visualization, statistical methodologies, tools for handling large volumes of data, and cutting-edge theories and frameworks all come together in this unique master’s program in Business Analytics. Our graduates are highly sought after in a variety of areas, including marketing, finance, insurance, health care, consulting, operations, national security, and online advertising.
